

In 1991, two college grads were hard on their luck and trying to find a job. A business venture gone bad left them with close to 1000 t-shirts and a huge credit card bill to boot. In an attempt to alleviate their cramped apartment of the surplus t-shirts and pay bills, they started selling shirts to the Greeks at Western Kentucky University. One thing led to another and this happy accident eventually became the real deal! With a world-wide customer base as our foundation, BlueCotton has grown into a thriving, robust company specializing in custom t-shirts and adding more members to our family each year. We are proud to say that BlueCotton has been recognized on the Inc. 5000 list of fastest growing companies for the last four consecutive years and we are excited about what the future has to offer including you!
